Installation

Solid Surfacing by Formica Group products are intended for installation by professional fabricators. Your Solid Surfacing by Formica Group distributor or representative can provide names of fabricators in your area. The *Solid Surfacing Fabrication Guide by Formica Group* (available from your dealer, distributor or www.formica.com) provides detailed instructions for the fabrication of sheets and sinks/bowls. Design and fabrication of Formica® Designer Series differs from traditional solid surfacing. In order to enhance the look of your designs, consult the *Solid Surfacing Fabrication Guide by Formica Group* prior to specification or fabrication.

Maintenance

Solid Surfacing by Formica Group sheets and sinks/bowls may be cleaned with a damp cloth and ordinary soap, household liquid detergent, household chlorine bleach, or (for matte finish) a powdered cleanser. Strong acid or alkaline drain cleaners and oven cleaners will damage the surface. Stubborn stains or unusual damage can be repaired with Scotch Brite® pad #7448 or 320-360 grit sandpaper. Severe damage can often be repaired by sanding with 120 grit sandpaper and then following with 220 grit paper. For matte finish, follow sanding with a Scotch Brite® pad #7447 (or equivalent) to match gloss level of sanded area to the surrounding area. Plastic or counter cleaner polishes will enhance the appearance.

Simple Precautions

Heat: Do not place high temperature objects (e.g. teapot) or heat-generating appliances directly on the Solid Surfacing by Formica Group product. Hot cookware and heat generating appliances can damage the countertop surface. The use of a trivet or other insulating pad is recommended.

Cutting: Avoid cutting on your Solid Surfacing by Formica Group top. Under excessive or abusive usage conditions, Solid Surfacing by Formica Group will show cut marks. The use of a cutting board is recommended.

Stains: While Solid Surfacing by Formica Group is resistant to most common household chemicals, some strong acid or alkaline cleaners and cleansers can mar or permanently discolor Solid Surfacing by Formica Group if allowed to remain on the surface for an extended period. Accidental spills or splatters from harsh materials should be wiped off immediately and then rinsed with water. Potentially harmful compositions include: toilet bowl cleaners, drain cleaners, rust removers, contact adhesive solvent, ceramic cooktop cleaners, oven cleaners, paint or varnish removers, lacquer thinners, metal cleaners, and products containing acetone.

Removing Scratches

Dark Colors – To remove fine scratches or burnished areas from the surface of a dark colored solid surface: Pour some mild abrasive liquid such as Comet® Cleanser or Soft Scrub® on a soft damp sponge or damp cotton cloth. In a circular motion, rub the area you wish to repair. Mild pressure should be applied. Clean the area thoroughly with clean water and wipe the surface until it is completely dry. Inspect to see surface to see if the damage has been repaired, if not, repeat steps 1-3.

For the deeper scratches, more aggressive abrasives may be required.

Gray (ultra fine) for satin finish 3M Scotch-Brite #7448 or Mirka® Mirlon #448

White (super fine) for buffing the finish 3M Scotch-Brite #7445 or Mirka® #445

Soak the **Gray** pad in clean water. In a circular motion, rub the area you wish to repair. Mild pressure should be applied. Clean the area thoroughly with clean water and wipe the surface until completely dry. Check to see if the damage has been removed. If not, repeat until damaged area is renewed.

Removing Scratches (continued)

Soak the **White** pad in clean water. In a circular motion, rub the area previously sanded with the Gray pad. Clean the area thoroughly with clean water and wipe the surface until completely dry. Check to see if the area has been blended to back to the original finish. Rubbing of the entire surface with the White pad may be necessary to blend the repaired area to the whole area.

Matte Finish: Sand with 220-grit sandpaper on sanding block. Use small circular motions until scratch is gone. Blend finish with an abrasive cleanser and a maroon 7447 Scotch-Brite® Pad.

Satin Finish: Sand with 320-grit sandpaper on sanding block. Use small circular motions until the scratch is gone. Blend finish with Soft Scrub® Cleanser (or equivalent) and a gray 7448 Scotch-Brite® pad.

Semi-Gloss Finish: Sand with 600-grit sandpaper on sanding block. Use small circular motions until the scratch is gone. Blend finish with a nonabrasive cleanser and a white 7445 Scotch-Brite® pad.

Polished Finish: Specialized tooling is required to achieve a high-gloss finish. Please contact your professional fabricator.

Maintenance is limited to cleaning with mild detergents or nonabrasive countertop cleaners and a soft cloth.
Should the above maintenance steps create a variation in the surface finish, proceed with the final blending step over the entire countertop surface.
